OPHTHALMIC CORNEAL SHIELD

VET SHIELD™72
Corneal Collagen Shield Dehydrated

Hydrate VET SHIELD™ 72 with BSS or any ophthalmic solution. VET SHIELD™ 72 will behave like a “sponge” to collect medications. Once placed on the surface of the eye, it will slowly release them over approximately 72 hours, the time the corneal collagen shield dissolves.

Indications:

- Corneal sequestrum
- Corneal abrasions
- Superficial chronic epithelial ulcers
- Deep ulcer with keratomalacia
- Chronic corneal epithelial defect
- Post-op keratotomy

- Nominal diameter of 14,5mm
- For dogs and cats
- Excellent continuous-delivery system for drugs to the eye (antibiotics, antiseptics, healing drops, corticosteroids)
- Ocular lubrication and eye surface protection
- Dissolve in 72 hours
- Box of 6 sterile corneal collagen shields

Recommended instructions for use:

- Hydrate the shield prior to use
- Anesthetize the eye
- Invert the shield
- Hydrate the eye and apply the shield
- Thoroughly hydrate the shield on the eye
- Vet Shield™ 72 will start to crumble gradually. If necessary, remove from the patient’s eye after 72 hours.
